Modern Warfare Target Minds, Systems, and Perception

Dr. Ravi Gupta
A weapon, by definition, is any object or instrument designed to harm, destroy, defeat, or subjugate an opponent. Conventional weapons—whether swords, daggers, spears, arrows, bullets, shells, or missiles—derive their destructive power from kinetic energy, a combination of mass and velocity. In contrast, non-kinetic weapons achieve their objectives through diverse means, targeting sensors, machines, and the physical or

psychological states of adversaries, rather than relying on direct physical impact.

While the effects of conventional kinetic warfare are typically confined to battlefields and borders, non-kinetic warfare possesses a far-reaching and insidious potential. Its influence can penetrate deep into the lives, homes, and minds of citizens, affecting entire societies rather than just military targets.

The first-ever "Tri-Services Future Warfare" course, conducted by the Headquarters, Integrated Defence Staff in September, marked a significant step in redefining India's military preparedness. With a focus on the non-physical and non-kinetic aspects of warfare, this groundbreaking initiative delved into emerging domains like cyberattacks, psychological operations, and electromagnetic tactics.

As the nature of conflicts shifts away from conventional battlefields to unseen realms, the course highlighted the growing importance of influence, disruption, and control in modern warfare. This article explores the evolving landscape of non-kinetic warfare, uncovering how strategies that target minds, systems, and perceptions are shaping the future of global conflicts and why mastering these domains is critical for national security.

All warfare, including non-kinetic strategies, operates across four critical dimensions: Prevention, Defence, Offense, and Damage Control. In preventing conflict, diplomacy and deterrence serve as essential tools. Both demand a nation to maintain comprehensive strength across its military, economic, political, and technological capabilities, ensuring self-reliance (*Aatmanirbharta*).

Deterrence works effectively when an adversary perceives that any misadventure would result in unacceptable repercussions.

Defensive mechanisms are vital to safeguarding a nation's people, land, resources, and interests during an attack. Offensive capabilities, on the other hand, not only serve as a deterrent but also provide the means for swift retaliation if provoked. Lastly, robust systems for damage control and harm mitigation are indispensable to minimise the impact of any attack and to recover effectively.

Bharat has made significant strides in strengthening all these dimensions. It continues to advance relentlessly, adapting to the constant evolution of warfare tactics, including both kinetic and non-kinetic domains, ensuring national security and resilience in an ever-changing global landscape.

The scope of non-kinetic weapons and warfare is vast, encompassing domains such as Information Warfare, Psychological Warfare, Electronic Warfare (including Directed Energy Weapons), Cyber Warfare, and Chemical, Biological, Radiological, and Nuclear (CBRN) Warfare. These methods often overlap, and in practice, they may be deployed individually or in conjunction with kinetic weapons to achieve strategic objectives.

Given their complexity and breadth, it is challenging to provide an exhaustive overview in a brief write-up like this. The intent here is to offer a high-level perspective on the subject.

Play, Create, Innovate: Careers in Game Design

Abhinav Srivastava
What is Game Design?

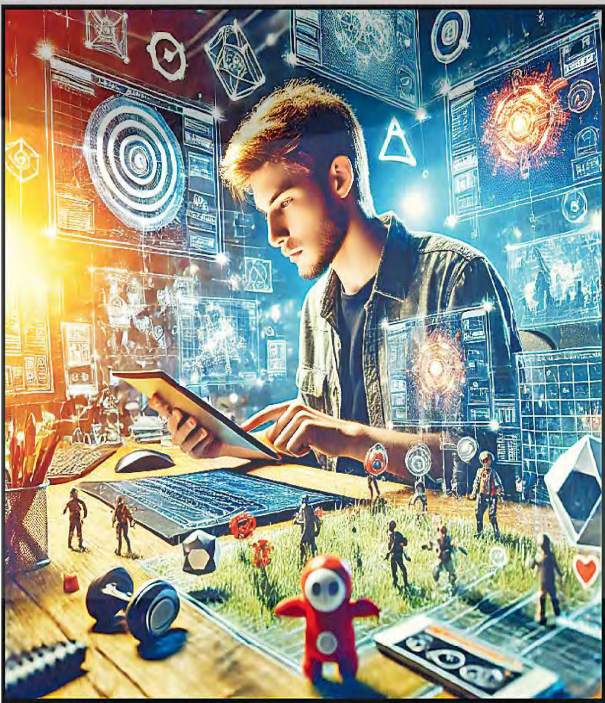

Imagine a career where your job description reads: "Make dragons fly, heroes shine, and players believe." That's game design—equal parts storytelling, tech brilliance, and sheer imagination.

Curious how to craft this dream career? Let's decode the world of game design with some invaluable tips.

What Does a Game Designer Actually Do?

Think of game design as a creative playground where ideas come to life. It's not just about having cool concepts but about shaping characters, stories, and challenges that spark joy, zeal, (and may be a little rage) in players. Game designing is a role that demands you wear multiple hats—and may be even juggle them at times! From rules to worlds, every detail matters. And yes, "fun" isn't accidental; it's carefully engineered.

A game designer is like a conductor orchestrating a symphony of pixels, code, and imagination. Some of their key gigs include:

- Writing storylines, character backstories, and dialogues
 - Designing rules, scoring systems, and gameplay mechanics
 - Building magical worlds and challenging levels
 - Scripting, programming, and testing (lots of testing)
 - Making sure everything fits together like a beautiful (and fun) puzzle
- It's not all solo work; collaboration is key. You'll brainstorm, adapt, and defend your ideas while keeping the end goal—a killer player experience—in sight.

The Tools of the Trade

Want to speak the language of game development pros? You can accustom yourself with these free game engines:

R&D IN INDIA

INNOVATIONS
UNLOCKED**Dr. Manish Mohan Gore**

The India International Science Festival (IISF) is a celebration of science, technology, innovation, and entrepreneurship. This festival is attended by people from all sections of society and demonstrates how science and technology transform and improve our lives. IISF also shares India's scientific legacy with the public. The foundation of this festival was laid in 2015 by the Ministry of Science and Technology and the Ministry of Earth Sciences, Government of India, in collaboration with VijnanaBharati (a science movement with a Swadeshi spirit). In the same year, it was decided that one of the departments from the Ministry of Science and Technology and the Ministry of Earth Sciences would organise this science festival annually, in partnership with other ministries and departments of science and VijnanaBharati. The primary objective behind the initiation of this programme was to involve the general public in celebrating India's scientific and technological achievements and progress. People from different countries around the world participate in many of its programmes, giving it a global dimension. The key objective of this mega science festival is to serve society and humanity, fostering curiosity and a scientific temper among people. Today, it has become a unique platform to connect people with science.

Science Festival: An Innovative Experiment to Bring Science to Society

Science and technology have a vast impact on society and human life. Therefore, it is essential for the general public to be informed about science and technology. Generally, there is little interaction between science and the general public, and several efforts have been

made over time in India to bridge this gap. The science festival is one such experiment in which the latest scientific information is shared with the public. From the 1960s, science fairs or festivals were introduced in India as part of a People's Science Movement, under which science groups and science-related activities were organised in semi-urban and rural areas of the country.

Science festivals are celebrated in many countries around the world, acting as a bridge between science and the public. However, the India International Science Festival (IISF), organised every year in India since 2015, is unique in many ways. In this vast science festival, activities are organised not only for the country's leading children, teachers, and scientists, as is the case in other science festivals, but also, going beyond these key stakeholders, programmes are organised for many important sections of society whose lives and professions are impacted by science and technology in some way or another. Apart from children, teachers, and scientists, IISF has a place for every section of society, including artisans, farmers, entrepreneurs, science communicators, science journalists, science ministers, start-ups, women, etc. In this way, the India International Science Festival is an inclusive event, organised annually in different parts of the country, incorporating the science inherent in local culture, traditions, food, etc. This year, the tenth edition of IISF is scheduled at IIT Guwahati from November 30 to December 3, 2024. This will be the first IISF to be hosted in North East India, a region with eight states located in the far North-Eastern part of India. The culture, traditions, and food systems of these states have a scientific approach.

Concept Behind IISF

The India International Science Festival is an initiative inspired by VijnanaBharati. This voluntary organisation is a

science movement started by eminent Indian scientists. The basic objective of IISF is to provide an opportunity for all people in society to celebrate science. People from various sections of society get a chance to meet and connect with the scientific community of the country and the world, and to learn about the innovative scientific initiatives being adopted in other countries, including India, through the creative events and activities of IISF. Ultimately, human welfare is intrinsic to the activities of science, which impact all of us.

Prime Minister, Shri Narendra Modi, is working towards making India a developed nation by the year 2047, when the country will complete 100 years of independence. Science and technology will play a crucial role in India's journey to becoming a developed nation. The central theme around which IISF 2024 is being organised is "Transforming India into a Science and Technology-Based Global Manufacturing Hub." To turn this vision into reality, the Government of India aims to create a prosperous India, in harmony with modern infrastructure and nature, providing citizens from all regions the opportunity to reach their full potential through science and technology.

Important Events of IISF 2024

A giant 10-metre high replica of the moon will be constructed in Guwahati to celebrate the success of the Chandrayaan mission, as the city hosts IISF from 30 November. During the four-day event at IIT Guwahati, a 1:50,000,000 scale model of the moon will be placed in the city's central location. The moon replica will be installed by British artist Luke Jerram.

This moon model will spark curiosity among children, youth, and the general public, allowing them to understand the structure of the moon, its surface, and the area on the south pole where India's Chandrayaan has landed.

A Science-Technology-Defence-Space Expo is also being organised at IISF 2024. The Science-Tech Expo will highlight India's glorious achievements, progress, successes, and success stories, with the aim of promoting science and technology, space, defence, scientific temper, raising awareness on social issues, and inspiring future generations.

IISF 2024 will feature a programme called "Science Odyssey," which will propose scientific solutions to challenges faced by North East India, in particular. There will be two sessions each day, with 250-300 participants, especially from the North East. The sessions will include interactive public lectures and panel discussions.

The "Student Science & Technology Village - The New Nalanda" event, designed to bring together and inspire the younger generation, will be an integral part of IISF 2024. This event aims to generate curiosity among students in Science, Technology, Engineering, and Mathematics (STEM) through educational games and challenges. These activities will encourage problem-solving and critical thinking among young minds.

The "Pragya Bharati" event will showcase a new dimension in science and technology that aligns with the broader goals of development and progress for a developed India by 2047. The programme will focus on cutting-edge research in scientific fields such as AI, ML, Big Data, Quantum Computing, Biotechnology, Genomics, Sustainable Green Technology, Space Technology, Cyber Security, Advanced Manufacturing, Healthcare Innovation, Automation, and Robotics.

The "Nari Shakti" event, focused on women's leadership in S&T, will aim to actively involve women in targeted discussions, creating space for their leadership and ensuring their perspectives influence science and technology policies and practices.

The S&T Hackathon of IISF 2024 will encourage school and college students to develop innovative solutions related to science and technology, with a focus on India's vision for a developed future. The problem statements for this hackathon will be submitted by various departments of Science and Technology, Space, Atomic Energy, and Earth Sciences in the Government of India.

The Minister-Secretary-CEO Conclave will bring together Science Ministers from the Central and State Governments, Departmental Secretaries, and CEOs from industry to discuss critical issues, share insights, and collaborate on strategies that impact both the public and private sectors. These sessions

will focus on how science and technology can be effectively used to meet the requirements of a developing India by 2047.

"Gurukul" is an event dedicated to enhancing the quality of science education in India. It will equip teachers with innovative teaching methodologies, modern tools, and strategies to effectively impart scientific knowledge to students. Gurukul will focus on providing a comprehensive toolkit to help educators become effective and inspiring teachers.

The "Sagarika" event aims to educate and connect people with the interlinked fields of meteorology, oceanography, and ecology, helping them understand their impact on the Indian ecosystem.

"Vigyanika" is a unique IISF event focused on science popularisation. It will showcase the communication of scientific concepts and discoveries through literature.

The event titled "Fusion Forum - Atomic Assembly" will engage the public on the role of nuclear energy in achieving energy independence and self-sufficiency in India. It will discuss the current outlook, future benefits, and pressing challenges of nuclear energy implementation in various sectors.

The Science & Technology Media and Communicators Conclave will provide a unique platform for media personnel, journalists, communicators, and scientists to stay updated on the latest scientific developments and share their stories with the public. The Conclave will also discuss the challenges and opportunities of science journalism.

One unique event at IISF 2024 will appeal to food lovers. "Taste of the Hills" will offer North-Eastern cuisine to the participants of IISF 2024. The dishes and flavours of North-Eastern food are distinct from other regional cuisines in India, often featuring a fusion of local indigenous ingredients and traditional cooking methods, reflecting the rich cultural heritage of the region.

Thus, with these exciting and informative events, the tenth edition of the India International Science Festival will be the first in North East India from November 30 to December 3, 2024. This unique science festival will bring together participants and experts from different countries, including India, to share their experiences, ensuring that everyone benefits from science and technology. All are encouraged to participate in this event to experience science as a celebration.

(The author is a Scientist with CSIR-National Institute of Science Communication and Policy Research, and Editor of the popular science magazine 'Vigyan Pragati')

Modern Warfare Target Minds ...

Bharat has long recognised the significance of these non-kinetic forms of warfare and has proactively worked to address them as they have evolved. The Defence Research and Development Organisation (DRDO), as the country's premier agency for defence research and development, has been at the forefront of this effort. DRDO conducts in-depth research and develops both measures and countermeasures in these critical areas, ensuring that India's security agencies are equipped with cutting-edge technologies to safeguard national interests.

Electronic Warfare (EW)

The discovery of radio waves by Heinrich Hertz in 1886, followed by Guglielmo Marconi's invention of the radio, revolutionised military and civil communications. As with any new technology, countermeasures and counter-countermeasures quickly evolved. Methods to intercept or block radio communications were extensively utilised during the First World War. The reflective properties of radio waves, akin to visible light, were soon harnessed to detect ships and later aircraft, leading to the development of radars (Radio Detection and Ranging). This, in turn, spurred the creation of countermeasures to jam or evade enemy radars.

The Electromagnetic Spectrum (EMS), and the technologies reliant on it, are now indispensable in both military operations and modern life. Electronic Warfare (EW), or Electromagnetic Warfare, encompasses the entire electromagnetic spectrum—from radio, infrared, and microwaves to visible light, ultraviolet, and beyond. EW involves actions to ensure uninterrupted spectrum use by friendly forces for detection, tracking, deception, or destruction of enemy targets, as well as denying spectrum access to adversaries. The three pillars of modern EW are Electronic Support, Electronic Protection, and Electronic Attack.

Sonars (Sound Navigation and Ranging), though reliant on sound waves rather than electromagnetic waves, perform a similar function to radars by detecting, tracking, and monitoring surface and underwater objects. These systems are also considered integral to EW capabilities.

The Defence Research and Development Organisation (DRDO) has made pioneering contributions to achieving total *Aatmanirbharta* (self-reliance) in EW, vital for national security. Key DRDO laboratories engaged in EW R&D include DLRL (Electronic Countermeasures and Counter-Countermeasures), DEAL (Military Communications), IRDE (Electro-Optical Systems), LRDE (Radars), NPOL (Sonars), NMRL (Materials and Energy Systems), DLJ (Stealth and Camouflage), DRDO Young Scientist Labs (DYSLs), and DRDO Industry Academia Centres of Excellence (DIA-CoEs).

These labs specialise in diverse areas such as battlefield surveillance radars, long-range space-monitoring radars, EW suites for detecting and jamming enemy radars, communication intelligence systems, Directed Energy Weapons (e.g., anti-drone systems), sonars for naval vessels, stealth countermeasures, decoys, and secure communication technologies. These innovations showcase India's readiness to address both current and emerging non-kinetic warfare challenges.

This article highlights the DRDO's work in EW to emphasise India's technological preparedness for non-kinetic threats.

Further references to specific labs or products will be minimised in subsequent sections.

Cyber Warfare

Cyber warfare involves actions to damage, destroy, or manipulate an adversary's computer systems or information networks, as well as measures to defend one's own assets from such attacks. As computer systems and information networks have become integral to daily life and essential components of a nation's economic and military activities—such as banking, transport, power generation and distribution, healthcare, and military communications—defending cyberspace is now as critical as protecting physical assets.

A unique aspect of cyber warfare is that the attacker can range from a nation or organisation to a group of individuals or even a single person, yet the potential damage can be catastrophic. For instance, a 15-year-old boy reportedly managed to hack into the networks of NASA and the Pentagon. The potential consequences of such an incident are unimaginable. Unlike conventional warfare, cyber warfare can inflict exponentially greater damage with a fraction of the resources typically required.

Cyber-attacks exploit vulnerabilities in target systems, whether existing in hardware or software or introduced inadvertently or deliberately by authorised users. This underscores the need for *Aatmanirbharta* (self-reliance) in computer- and network-based devices and software. A nation has neither control nor jurisdiction over manufacturing facilities located abroad, making it imperative to develop domestic capabilities, especially for devices and software used in military systems, weapons, and critical infrastructure such as power grids and railways.

Cyber-attacks may have varied objectives, including espionage, sabotage, denial of service (e.g., ransomware), propaganda, economic disruption, or interference with transport, power distribution, or any other computer-based system crucial to the functioning of a nation.

Information Warfare, Psychological Warfare, and Cognitive Warfare

On August 15, 2012, thousands of people from India's northeastern region, who had been living and working in Bengaluru for years, suddenly fled the city in panic. These individuals, employed in diverse sectors such as IT, healthcare, hospitality, and security, left en masse due to threatening messages circulating widely. This unprecedented exodus caused massive disruptions in workplaces and the city at large, leading to substantial financial losses, shaken investor confidence, and untold suffering for the affected individuals and their families. Such an incident illustrates the devastating potential of information warfare, which achieves significant disruption at minimal cost. Similar tactics were evident during protests against the Citizenship Amendment Act (CAA) and the farm laws.

While closely related, information warfare, psychological warfare, and cognitive warfare are distinct concepts:

- Information warfare seeks to gain control over an adversary's information space through the use of information, electronics, and communication technologies to achieve political or material advantages while protecting one's own information space.

- Psychological warfare manipulates the reactions of individuals or groups by controlling the flow of information available to them. It aims to evoke fear, anxiety, despair, or anger, altering perceptions, emotions, opinions, and behaviours.

- Cognitive warfare goes further, targeting the mental processes of acquiring knowledge and understanding. Unlike psychological warfare, which focuses on reactions to specific stimuli, cognitive warfare seeks to fundamentally reshape thought processes.

These types of warfare share significant overlap and often employ tactics and technologies common in marketing and sales. For example, a brief online search for a T-shirt may lead to a deluge of targeted advertisements on social media (information technology). Some brands might attempt to make the individual believe their product is essential to look stylish (akin to psychological warfare). In more extreme cases, advertising could influence the person so deeply that they feel compelled to promote the brand, as if it were a personal mission (a cognitive effect). Religious and ideological fanaticism are stark examples of the cognitive warfare phenomenon.

Together, these three forms of warfare take the battlefield into the human mind. Leveraging technology, conventional and social media, and ideological beliefs alongside an understanding of human psychology, they shape how people perceive reality and react to situations.

Historical and Contemporary Examples

Cognitive warfare is not new. Ancient texts like the *Mahabharata* and *Ramayana* mention the use of *maya* (loosely translated as "illusion") to subdue adversaries. One of the most profound examples is the transformation of Arjuna's mindset during the *Mahabharata*, where the wisdom of the *Bhagavad Gita* delivered by Krishna turns a dejected warrior into a resolute one. Similarly, Chanakya's strategies of *saam*, *daam*, *dand*, and *bhed* encapsulate key elements of cognitive warfare, albeit with tools specific to the era.

Modern technology, however, has revolutionised how these forms of warfare are conducted. Current examples include the ongoing narrative battles around the Ukraine-Russia war, the Middle East conflict, and political instability in Bangladesh. These illustrate how non-kinetic warfare is being increasingly used to achieve geopolitical and strategic objectives.

Economic Warfare

Economic warfare involves employing a variety of strategies to weaken an adversary nation's economy. The objectives may include creating political unrest, diminishing military strength, effecting a change in the political regime, or achieving subjugation. Tools commonly used as weapons in economic warfare include disrupting trade and economic activities, destroying profit margins, imposing blockades on shipping routes, denying access to the nation's own resources (e.g., by destroying crops, transport systems, or industries), and enforcing embargoes or technology denial regimes.

The globalisation of trade and economies has opened new avenues for conducting economic warfare. It is often said that economic warfare activities played a pivotal role in the disintegration of the Soviet Union. Similarly, control regimes and technology denials have significantly hampered India's progress, particularly in achieving *aatmanirbharta* in the defence sector. Delays in the

supply of F404 aircraft engines for the Tejas fighter aircraft serve as a notable example of economic warfare.

The primary means of defending against economic warfare are fostering *aatmanirbharta*—especially in critical sectors—and developing the capability to conduct economic warfare, complemented by robust diplomacy.

Chemical, Biological, Radiological, and Nuclear (CBRN) Warfare

The devastating potential of a CBRN disaster has been starkly highlighted by the COVID-19 outbreak, reportedly originating in Wuhan, China, and swiftly spreading across the globe. CBRN warfare involves the use of chemical, biological, radiological, and nuclear agents to harm an adversary in various ways. These weapons, often classified as Weapons of Mass Destruction (WMD), have also been employed effectively on a more limited scale. Unless the target is well-prepared and forewarned, a CBRN attack can inflict significant damage before its effects are even recognised.

While international treaties prohibit the use of CBRN warfare, and most nations are signatories to these agreements, both state and non-state actors have clandestinely employed CBRN agents. Terrorists, in particular, disregard rules and treaties. The nuclear bombings of Hiroshima and Nagasaki, the use of chemical warfare agents in Vietnam, and the recent "Coronavirus disaster" all underscore the grim reality that "might is right" often prevails in enforcing international norms.

India is a technologically advanced CBRN-enabled state, an active member of the Executive Council of the Organisation for the Prohibition of Chemical Weapons (OPCW), and a signatory to the Biological and Toxin Weapons Convention (BTWC) and other similar treaties. India participates in global efforts to prevent the use of these devastating weapons while prioritising its own national security interests.

Defence against CBRN attacks is structured around a four-pronged strategy: **Detection, Protection, Decontamination, and Medical Mitigation**. The Defence Research and Development Organisation (DRDO) has developed a wide range of technologies and products in these areas, and domestic industries are actively manufacturing these for national security purposes.

Artificial Intelligence

Although not considered a distinct class of warfare, artificial intelligence (AI) is revolutionising every aspect of non-kinetic warfare. AI is transforming the entire spectrum of warfare, influencing:

- Adaptive radars and optoelectronic systems
- Communication systems and ECM/ECCM equipment
- Cognitive warfare tools
- Adaptive CBRN warfare systems
- Kinetic weapons

AI's ability to enhance adaptability and precision across these domains makes it a critical enabler of modern warfare strategies.

Concluding Remarks

A significant advantage of non-kinetic warfare, particularly cognitive warfare, is the difficulty in identifying and holding the real perpetrator accountable with conclusive evidence. This often leads to situations where one must coexist with the adversary. A stark example is the global devastation caused by the coronavirus pandemic, coupled with the continued economic interdependence with the prime suspect.

Play, Create, Innovate: Careers in Game Design

- Unity 3D
 - Unreal Engine
 - GameMaker Studio 2
 - Construct 3
 - Godot Engine
- These tools will help you turn your ideas into something playable and (fingers crossed) hireable.

Got What It Takes? Here's the Checklist

- **Technical Wizardry:** You don't need to be a coding genius, but knowing your way around game systems and programming is a huge plus.
- **Artistic Flair:** Visuals matter! Understanding art and aesthetics will help you breathe life into your creations.
- **Storytelling Magic:** Games are modern-day tales. Can you weave a story players can't put down?
- **Communication Skills:** You've got the ideas; now sell them. Clear, engaging pitches are your best friend.
- **Trendspotting Radar:** Stay ahead of the curve by diving into the latest games, genres, and tech.

Career Options Galore

- Not every game design graduate ends up as a designer. The industry is packed with diverse roles, including:
- **Game Writer:** Spin captivating tales.
 - **Level Designer:** Craft immersive worlds.
 - **UI Designer:** Create interfaces players want to navigate.
 - **Creative Director:** Be the boss of big ideas.

Pro Tips to Score That Dream Gig

- **Master the Process:** Understand the game dev pipeline from start to finish.
- **Trend Surfing:** Read reviews, play games, and binge-watch game development diaries.
- **Polish Your Demo Reel:** Keep it short, stunning, and spammed with your best work.
- **Invest in Education:** Formal courses can help you leapfrog the competition.

The Future of Game Design

With billions of players worldwide, the gaming industry is exploding. From indie gems to AAA blockbusters, opportunities are endless for those ready to embrace the challenge. So, are you game for this journey? Level up your skills and unleash your creativity-because somewhere out there, a player is waiting for your masterpiece!

Essential Technologies for Game Design and How to Master Them			
Technology	Examples	Usage	How to Learn
Game Engines	Unreal Engine, Unity, Godot	Frameworks for rendering graphics, physics, sound, and gameplay mechanics.	Tutorials on official websites (e.g., Unreal Academy, Unity Learn), online courses, build simple projects.
3D Modeling & Animation	Blender, Autodesk Maya, 3ds Max	Creating characters, environments, and objects with detailed textures and animations.	Practice with free tools like Blender, watch tutorials, and enroll in animation courses.
Programming Languages	C++ (Unreal), C# (Unity), Python	Scripting gameplay, tools development, and automating processes.	Use beginner platforms like Codecademy, work on small projects (e.g., Pygame), explore GitHub projects.
Artificial Intelligence	TensorFlow, PyTorch, Unity's NavMesh	Develop intelligent NPCs, procedural content generation, and adaptive difficulty systems.	Study AI concepts with books (<i>Artificial Intelligence for Games</i>), implement behaviours in game engines.
Sound Design Tools	FMOD, Wwise, Audacity	Creating sound effects, background scores, and immersive soundscapes.	Experiment with Audacity, learn FMOD/Wwise integration in engines, take sound design courses.
AR/VR Development	AR/VR SDKs (Vuforia, Oculus SDK), Unity, Unreal Engine	Build immersive AR/VR experiences and integrate with hardware like Oculus or HoloLens.	Follow Unity/Unreal AR/VR tutorials, work with AR/VR hardware, enroll in XR development courses.
UI/UX Design	Adobe XD, Figma, Sketch	Design intuitive game menus, HUDs, and interfaces.	Practice wireframing in Figma, take online courses on UI/UX design for games.
Shaders & VFX	Shader Graph (Unity), Material Editor (Unreal), Houdini	Create shaders, procedural visual effects, and stunning graphics.	Learn Shader Graph/Material Editor, study shader math (linear algebra, vector calculus), use Houdini.

India's AVGC Policy: Fueling the Growth of the Gaming Ecosystem

India's Animation, Visual Effects, Gaming, Comics (AVGC) sector is rapidly emerging as one of the most exciting and lucrative domains in the global media and entertainment industry. With the rise of digital technologies and India's rich cultural heritage, the sector has witnessed remarkable growth, with projections indicating it will

India's Gaming Ecosystem
A Booming Industry with Boundless Potential

India's gaming ecosystem is experiencing explosive growth, making the country one of the most dynamic markets in the world. In 2023, India's video game market generated a remarkable \$ 868 million in revenue, marking a robust 15.9% year-over-year increase. This growth trajectory is expected to continue, with the Indian gaming market on track to surpass \$ 1 billion in revenue by 2025 and hit an astounding \$ 1.5 billion by 2027. India is already home to over 420 million online gamers, making it the second-largest gaming population globally, right after China. With a projected five-year growth rate of 17.2%, India is rapidly becoming a global gaming superpower.

Despite this impressive expansion, the Indian gaming industry still faces a significant challenge: the lack of a fully developed publishing ecosystem. While India boasts a vibrant community of game developers, there is a scarcity of domestic publishers equipped with the resources to help developers scale their games. In contrast to more mature markets like the U.S. and China, where domestic publishers capture a substantial portion of the market, Indian publishers only accounted for 6% of local consumer spending in 2022, a sharp decline from 11% in 2020. This gap has limited the industry's ability to cater to a broad spectrum of gaming genres, with many developers focusing on hyper-casual and casual games instead of exploring mid-core or hardcore genres.

However, this presents an enormous opportunity for growth. As the gaming market matures, the need for specialised Indian game publishers becomes increasingly urgent. These publishers could play a critical role by offering financial backing, forging strategic partnerships, and facilitating international distribution for Indian-developed games. Furthermore, by diversifying game genres and investing in local talent, they could help Indian developers build globally competitive Intellectual Properties (IPs).

contribute 60% of the global growth in anime interest in the coming years. Films like *Baahubali* and *RRR* have redefined the possibilities of visual storytelling, incorporating cutting-edge animation and visual effects (VFX) to create awe-inspiring cinematic experiences. The country is also home to the second-largest anime fan base globally, underlining the immense potential of India's AVGC sector.

In a strategic move to capitalise on this growing potential, the Indian government has recently approved the establishment of the National Centre of Excellence (NCoE) for AVGC-XR, situated in Mumbai. This initiative, supported by prominent industry bodies like the Federation of Indian Chambers of Commerce and Industry (FICCI) and the Confederation of Indian Industry (CII), aims to position India as a global hub for immersive content creation, including gaming, comics, and augmented reality (AR), alongside animation and VFX.

Nurturing a Thriving AVGC Ecosystem

The AVGC policy is designed to support and elevate India's gaming ecosystem by focusing on building a sustainable and innovative AVGC infrastructure. One of the key objectives of the NCoE is to create a talent pool capable of competing globally, while simultaneously fostering the creation of indigenous intellectual property (IP). This aligns with the vision of positioning India as a leader in digital creativity, innovation, and technology within the entertainment sector.

The center will be modeled after prestigious institutions such as the Indian Institutes of Technology (IITs) and Indian Institutes of Management (IIMs), ensuring a world-class education system that nurtures young talent in various fields of AVGC. With a focus on hands-on learning, students will gain practical exposure to industry-driven projects, ensuring they are job-ready upon graduation. This approach is not only expected to generate over 500,000 jobs in the sector but also stimulate the creation of high-quality, globally competitive content.

Strategic Focus Areas of the NCoE

The NCoE will be a hub for innovation, research, and development in the AVGC-XR domain. Here's how it will impact India's gaming ecosystem:

- 1. Fostering Indian IP Creation:** The center will emphasise the creation of original, culturally relevant IPs that tap into India's diverse heritage. By combining traditional storytelling with modern technology, the NCoE will offer unique narratives that appeal to both domestic and international audiences.
- 2. Boosting Industry Development:** The initiative will create a multiplier effect across the AVGC-XR industry, facilitating growth in areas such as animation, gaming, comics, and immersive technologies. The integration of virtual reality (VR), augmented reality (AR), and mixed reality (MR) into gaming will enhance user experiences and open up new markets.
- 3. Educational Excellence and Skill Development:** Through its robust educational programmes and industry partnerships, the NCoE will ensure a steady supply of skilled professionals capable of driving innovation in gaming. It will promote technical education, offering specialised courses and fostering talent through internships, mentorships, and start-up incubation programmes.
- 4. Global Reach and Innovation:** By collaborating with industry leaders and governments at both the state and central levels, the NCoE will build a dynamic ecosystem where research, development, and innovation thrive. The center will encourage cross-collaboration among game developers, animators, VFX artists, and technology experts to develop pioneering gaming experiences.

Economic Impact and Employment Generation

With India's gaming market rapidly expanding, the AVGC sector is poised to play a pivotal role in job creation and economic growth. By 2023, India's animation industry was valued at Rs. 46 billion, growing at a robust rate of 25%. Gaming, as a subset of AVGC, is witnessing explosive growth, driven by an increasing appetite for digital entertainment and the rapid adoption of mobile gaming platforms. The NCoE will create an ecosystem that facilitates the development of both hyper-casual and mid-core games, moving beyond the casual gaming market that has traditionally dominated India's gaming landscape.

The creation of specialised job roles within gaming and related industries such as VFX, animation, and comics will also provide new career pathways for India's youth. This will further enhance India's global competitiveness, with more homegrown games,

DATE OF OPENING – 06 Dec2024

LAST DATE FOR ONLINE APPLICATION – 20 Dec 24

1. Applications are invited from unmarried men and women candidates(fulfilling the conditions of nationality as laid down by the Govt. of India) for becoming Permanent Commissioned Officers in Executive and Technical branches under 10+2 B Tech Cadet Entry Scheme after undergoing four year B Tech course at the prestigious Indian Naval Academy, Ezhimala.

2. **Vacancies & Age.** The age eligibility & vacancies for the course are as under:-

Branch	Vacancy	Gender	Age
Executive & Technical Branch*	36	Men and Women (maximum of 07 vacancies for women)	Born between 02 Jan 2006 and 01 Jul 2008 (both dates inclusive).

(*Branch allocation viz Executive & Technical(Engineering & Electrical) will be undertaken at INA.)

Note (1). (a) Only one application is to be filled by a candidate.

(b) Vacancies indicated in Para 2 are tentative and may be changed depending on availability of training slots.

ELIGIBILITY CONDITIONS

3. **Educational Qualification.** Passed Senior Secondary Examination (10+2 Pattern) or its equivalent examination from any recognised Board with at least 70% aggregate marks in Physics, Chemistry and Mathematics (PCM) and at least 50% marks in English (either in Class X or Class XII).

4. **Who can Apply.** Candidates who have appeared for JEE (Main) - 2024 exam (for B.E/ B. Tech). Call up for Service Selection Board (SSB) will be issued on the basis of JEE (Main) All India Common Rank List (CRL) - 2024 published by NTA.

5. **Medical Standards/ Relaxation in Height and Weight/ Tattoo.** All candidates recommended by SSB are required to undergo medical examination applicable to 10+2 (B Tech) entry. Guidelines for medical standards are available on the Indian Navy website www.joinindiannavy.gov.in. There is no relaxation in medical standards on any grounds. **Change of medical hospital/centre is not permissible under any circumstances.**

6. SELECTION PROCEDURE.

(a) Naval Headquarters reserves the right to fix the cutoff for shortlisting of applications for SSB based on JEE (Main) All India Common Rank List (CRL)- 2024. All candidates are required to fill their Rank as per Common Rank List (CRL) in the application. SSB interviews for shortlisted candidates will be scheduled at Bangalore/ Bhopal/ Kolkata/ Visakhapatnam from Mar 2025 onwards.

(b) Shortlisted candidates will be informed about their selection for SSB interview through e-mail and SMS (provided by candidates in their application form). **Candidates are advised not to change their e-mail/ mobile number till selection process is over.**

(c) **Change of SSB Centre for examination/ interview is not permissible under any circumstances.**

(d) Candidates are to download the call up letter on receiving intimation from Naval Headquarters via SMS/email (provided by candidate in their application). Any correspondence regarding change of SSB dates should be addressed to the call up officer of the concerned SSB on receipt of call up letter.

(e) No compensation is admissible in case of any injury sustained as a result of tests during SSB interviews.

(f) AC 3 tier rail fare is admissible for the SSB interview, if appearing for the first time for particular type of commission. Candidates are required to bring photocopy of the first page of pass book or cheque leaf where the name, A/C No. & IFSC details are mentioned, while appearing for SSB.

(g) Details of SSB procedure are available on the Indian Navy website www.joinindiannavy.gov.in.

7. **Merit list.** Merit list would be prepared based on SSB marks. Candidates declared fit in medical examination would be appointed subject to police verification and character verification & availability of vacancies in the entry.

8. Training: -

(a) Selected candidates will be inducted as Cadets for the four years B. Tech Course in Applied Electronics & Communication Engineering, Mechanical Engineering or Electronics & Communication Engineering as per Naval requirements. On completion of the course, B. Tech Degree will be awarded by the Jawaharlal Nehru University (JNU). Distribution of cadets amongst Executive and Technical Branch (Engineering & Electrical) will be as per the extant policy.

(b) The entire cost of training, including books and reading material, will be borne by the Indian Navy. The cadets will also be provided with entitled clothing and messing.

9. **Pay & Allowances/ Group Insurance & Gratuity/ Leave Entitlements/ Duties of Officers.** Details are available on the Indian Navy website www.joinindiannavy.gov.in.

10. **How to Apply.** Candidates are to register and submit their application on the recruitment website www.joinindiannavy.gov.in. To save time during the application submission window, candidates can fill in their details and upload documents in advance under their user profile. The procedure for applying online is explained below.

(a) **Online (e-application).** Whilst filling up the e-application, it is advisable to keep the relevant documents readily available to enable the following:-

(i) Correct personal particulars details are to be filled up as given in the Matriculation Certificate/12th class certificate.

(ii) Fields such as e-mail address, mobile number are mandatory fields and need to be filled.

(b) All relevant documents (preferably in original), Date of Birth proof (as per 10th/12th certificates), 10th class marksheet, 12th class marksheet, JEE(Main)-2024 Scorecard (indicating Common Rank List (CRL)) and a recent passport size colour photograph should be scanned in original JPG/TIFF format, for attaching the same while filling up the application. Candidates are to take print out of application and carry it along with original certificates/ documents as mentioned in Para 10(b) while appearing for SSB interview.

(c) **If any scanned document is not legible/ readable for any reason the application will be rejected.**

(d) The application once submitted will be final and no request for amendments/change will be entertained.

Note (2). (a) Please read the instructions given on the website carefully before finally submitting your online application.

(b) Your candidature will be cancelled if any declaration is found wrong at any stage of selection.

(c) Only unmarried candidates are eligible for training. Any candidate who is found to be married or marries while under training will be discharged from service and shall be liable to refund full training cost including pay & allowances and any other expenditure incurred on the candidate by the Government.

(d) Use/ possession of narcotics is banned. Candidate may be tested for presence of drugs in the body during SSB selection/ medicals/ training and subsequently during service. If candidate is found to be using/ in possession of narcotics during any time of selection/ medicals/ training/ service career, candidate would be debarred from joining the Indian Navy or be removed from service if already joined.

Note (3): Your application is subject to subsequent scrutiny and the application can be rejected, if found INELIGIBLE/INVALID at any point of time.

Note: Scan this QR Code to apply online.

GENERAL INSTRUCTIONS

1. Only Indian Nationals are eligible to apply.
2. Candidate should read the complete advertisement carefully & ensure that he /she fulfills the eligibility criteria for the post advertised in all respects.
3. All the Essential Qualification must be full time and be recognized from AICTE/UGC/State Technical Board/Any other appropriate body.
4. If a candidate is claiming a particular qualification as equivalent qualification as per the requirement of advertisement, then he/she is required to produce order/ letter in this regard issued by the Competent Authority indicating the Authority (with number and date) under which it has been so treated, otherwise the candidature/Online Application is liable to be rejected.
5. Candidates are advised to give specific, correct, full information. All original certificates/documents in support of information furnished in the application form are to be produced at the time of verification of documents, failing which the candidate will be disqualified and accordingly not be allowed to participate in the selection process. Candidature is liable to be rejected at any stage of recruitment process or after recruitment or joining, if any information provided by the candidate is found to be false or is not found in conformity with eligibility criteria mentioned in the advertisement.
6. Incomplete application will be summarily rejected. Any request to add additional information in application form after the application has been submitted shall not be entertained in any condition.
7. Persons with benchmark disabilities can also apply for the above post in accordance with government of India guidelines in force. Disability of candidates should not be less than 40%.
8. The upper age limit, unless specifically mentioned, is for unreserved category candidates. Age relaxation for SC/ST/OBC (NCL)/PWD will be as per Government guidelines in this regard. Reserved category candidates are required to upload scanned copy of their caste/disability certificate (as applicable) along with the application form. Age Relaxation for Ex-Serviceman will be service rendered in the Armed forces plus 03 years. Internal candidates (NBCC India Ltd) will be given age relaxation of five years provided they have at least two years of service left before superannuation for posts to be filled on Direct Recruitment subject to fulfillment of other eligibility criteria, terms and conditions. Internal candidates working on contractual establishment will be entitled for age relaxation of 5 years for post to be filled on Direct Recruitment subject to fulfillment of other eligibility criteria and terms and conditions.
9. In case of variation in name / surname / name spelling mentioned in the application with that in the respective certificates pertaining to education / professional qualification / caste / etc., the applicant shall be required to submit a certificate from SDM or equivalent to this effect along with the respective documents at the time of verification of documents, failing which the candidature shall liable to be cancelled. In case of change of surname of female candidate after her marriage, she is required to furnish marriage certificate and notarized affidavit in this regard.
10. Relaxation of standard in selection against reserved vacancies if sufficient number of reserved category persons is not available on the basis of laid down general standards, the general standards could be relaxed suitably to fill up the reserved posts.
11. The cut-off date for determining the age limit shall be the closing date of submission of online applications. The date of declaration of result / issuance of mark sheet shall deem to be the date of acquiring the qualification and there shall be no relaxation on this account.
12. The crucial date for determining the age limit & post qualification experience shall be the closing date of submission of online application.
13. Candidates working in Government, Semi-Government Organization/Public Sector Undertakings and Autonomous Bodies should apply through proper channel or furnish "NO OBJECTION CERTIFICATE" at the time of Interview. However, in the event of difficulty in forwarding the application through proper channel/getting NOC from their parent department, they may submit an undertaking at the time of Interview that they will produce proper relieving order from their organization, in case selected; otherwise they will not be allowed to join.
14. Selected candidates will be required to serve in any part of India or abroad including its subsidiaries & JV companies as per the discretion/requirement of the Company.
15. Wherever CGPA/OGPA or grading system in a degree / diploma is awarded; equivalent percentage of marks should be indicated in the application form as per norms adopted by the University/Institute. The candidate will have to produce a copy of these norms with respect to his/her university/institute at the time of verification of documents.
16. Candidates are required to retain a copy of the online submitted application form for future reference.
17. Number of vacancies mentioned above may increase or decrease depending upon the requirement of the Company.
18. NBCC reserves the right to cancel this advertisement and/or the selection process at any stage for any of the above post without assigning any reason.
19. Candidates are advised to keep their e-mail ID given in the Application form active for at least one year. No change in e-mail ID will be allowed.
20. Any corrigendum/addendum/errata in respect of the above advertisement shall be made available only on our official website **www.nbccindia.in** under the head: "CAREER within Human Resources". No further press advertisement will be published. Hence prospective candidates are advised to visit NBCC website regularly for latest updates.
21. Any canvassing, directly or indirectly, by the candidate will disqualify his/her candidature.
22. SC/ST/PWD candidates called for Personal Interview will be paid to and fro 3rd AC rail fare or bus fare from the nearest railway station / Bus Stand of the declared place of residence by the shortest route beyond 30 km, on production of proof of journey undertaken and onward journey.
23. Any legal proceedings in respect of any matter of claim or dispute arising out of this advertisement and/or applications in response thereto shall be subject to jurisdictions of Courts at Delhi. In case of any ambiguity / dispute arising on account of interpretation other than English, the English version will prevail.
24. All correspondence shall be made through email only and no communication would be sent through courier/post or through any other mode.

8. SELECTION OF THE CANDIDATES

The applications will be scrutinized and suitable candidates will be shortlisted for further selection process. Department reserves the right to decide the number of candidates to be called for field trials based on the credentials of the candidates. The eligible candidates will have to appear in the field test relevant to Sports discipline. Success in the above tests confers no right to appointment unless the department is satisfied after such enquiry as may be considered necessary that the candidate is suitable in all respects for appointment to the post.

9. Field trial will be conducted to check the fitness levels and performance of the candidates. Field trials will carry marks and will also be counted for ranking purpose. In case any candidate is unable to take the fitness test for any reason whatsoever or having taken the test is not found fit, the candidates would not be considered for the post. The current form will be evaluated based on the year of participation in recognized tournaments/events in the calendar year 2024, 2023, 2022, 2021 and 2020 for which the details should be furnished as per **Annexure-I**.

10. The shortlisted candidates will be called for written test. The written examination for the post of Tax Assistant/Stenographer/Havaldar/Canteen Attendant will be in English/Hindi and will consist of objective type multiple choice questions in General Knowledge, Reasoning, Numerical/Quantitative Aptitude, General English and General Awareness. Written test is purely qualifying in nature. The candidates applying for Tax Assistants posts will be required to take a data entry test for 15 minutes. The candidates applying for the post of Stenographer Gr-II will be required to take skill test for stenography as per prescribed norms. For the recruitment to the post of Havaldar, there would be a physical test. Based on the aggregate marks obtained in the field trials and merit certificates, the candidates will be ranked for selection.

11. The field trials and written exam will be held in Kochi. The selected candidates will be required to appear for the same at their own expenses on the dates and time to be informed later.

12. The applicant should enclose attested copies of the following certificates.

- (i) Matriculation/SSC or equivalent certificate for proof of age.
- (ii) Education qualification certificates.
- (iii) Sports/games certificates as mentioned in **Annexure-I**.
- (iv) Relative Forms for Sports/games certificates as mentioned in **Annexure-A**.
- (v) Caste certificate in proof of caste (if applicable).

13. **Sports achievements (Forms) certified by authorities other than those recognized by the Ministry of Sports and Youth Welfare shall not be considered.**

14. **Sports persons who are already employed in Central Government or State Government or PSU should submit an NOC from the present employer which should be enclosed with the application.**

15. The selected candidates will be on probation for a period of 2 years or such period as per the extant instructions of the Government of India. Their participation in the tournaments/meets on behalf of the Department will also be a deciding factor in the declaration of their probation. The selected candidates will be required to represent the Central Tax and Customs Department, Thiruvananthapuram Zone in the tournament /meets as decided at least for 10 years. **The selected candidates will also be required to sign an undertaking that he will not seek inter-zone transfer for a period of 10 years.**

16. Any form of canvassing by any candidate will render his/her candidature liable to be rejected summarily at any stage of the recruitment process.

17. The Principal Commissioner of Central Tax, Central Excise, Kochi Commissionerate has got the right to cancel the recruitment process.

18. In the event of any tie the decision of the appointing authority will be final.

19. This recruitment is subject to applicable rules for recruitment of meritorious sports persons, issued by Government of India from time to time.

20. **The Annexures to be downloaded from "<https://cenexcisekochi.gov.in/>"**

21. For any updates please visit "<https://cenexcisekochi.gov.in/>"

8. IAF Offers You Pay on Commissioning (As per 7th CPC).

Rank	Pay as per Defence Matrix	Level	MSP
Flying Officer	Rs. 56100 - 177500	10	Rs. 15500

Note. Flight Cadets shall receive a fixed stipend of Rs 56,100/- per month during one year of training.

9. Allowances. In addition to pay, allowances are applicable based on the nature of duty/ place of posting and it includes Flying, Transport, Technical, Field Area, Special Compensatory (Hill area), Special Force, Siachen, Island Special Duty, Test Pilot & Flight Test Engineer, Area and Remote Locality Allowance, etc.

10. Privileges. Air Force Officers are entitled to furnished accommodation, comprehensive medical cover for self and dependents, Canteen, Officers' Mess, loans at subsidised rates, LTC etc. Leave (60 days annual and 20 days casual), subject to service exigencies.

11. Insurance. Rs. 1.25 crore Insurance Cover (on contribution) is applicable to service officer from Air Force Group Insurance Society (AFGIS).

12. Sports and Adventure. Indian Air Force provides state of the art facilities to play various sports and adventure activities (sky diving, micro light flying, mountaineering, water rafting etc.).

IMPORTANT INSTRUCTIONS

13. Eligible candidates are to register online through separate tabs available for AFCAT Entry/ NCC Special Entry. Candidates eligible for one/more entries are to register separately in each entry.

14. Tattoos. The policy on permanent body tattoos is as follows:-
- (a) Permanent body tattoos are not permitted on any other body part either visible or non-visible part, except on the inner face of forearms i.e. from Inside of the elbow to the wrist of both the hands and Reverse side of the palm / back (dorsal) side of both hands for which a candidate will be required to sign a Self-declaration Certificate. Small innocuous tattoos that are not prejudicial to good order and military discipline, are permitted e.g. religious symbols or names of near and dear ones.
- (b) Tribes with tattoo marks on the face or body as per their existing customs and traditions will be permitted on a case to case basis.

15. Narcotics. Use/ possession of narcotics is banned. Candidate may be tested for presence of drugs in the body during Medicals and subsequently during training/ service career as an officer. If candidate is found to be using/ in possession of narcotics during any time of training/ service career, candidate would be debarred from joining the Indian Air Force or be removed from service if already joined.

16. Conduct of Online Testing for AFCAT Examination and Fee Structure. Online testing will be conducted for AFCAT entry at various centers. Candidates registering for AFCAT entry will have to pay an amount of Rs. 550/- + GST (non-refundable) as examination fee. However, candidates registering for NCC Special entry are not required to pay. Details of conduct of exam, examination centers and mode of payment are available in the notification.

17. Marital Status. Candidates must be unmarried at the time of commencement of the course and marriage is not permitted during training. A candidate who marries during the period of training shall be discharged and will be liable to refund all expenditure incurred on him/ her by the Government.

18. Candidates are required to maintain their unique registered E-Mail ID and mobile phone number active throughout the selection process.

19. Please note that information filled up by the candidates in online application form will be considered final and no amendments will be allowed subsequently. Candidates should exercise due care while entering their date of birth.

20. Travel Allowance (TA). To and fro travelling fare by the shortest route of AC-III Tier/ AC Chair Car or actual normal bus fare will be reimbursed to the candidates appearing in Air Force Selection Board for the first time. For all other modes of travel, TA will be admissible as per the Government authorized rules. No TA is admissible, if you have already appeared for the same type of entry at any of the Selection Boards. Candidates are to furnish the correct and active Saving Bank Account which needs to be in their name and no other name or Bank Accounts like Sukanya Samridhi etc will be acceptable for transfer of the claim. In case of any delay in furnishing admissible tickets/bank account etc, a maximum period of one month from the date of commencement of SSB will be considered after which no TA claim will be paid and the amount will be returned to the Government. No further queries/claims will be accepted in this regard.

21. Physical Conditioning. You are advised to be physically fit when you report for SSB in order to be able to undergo the tests at AFSB. You should aim to achieve an ability to run 01 mile (1.6 kms) in 10 minutes, do 10 push ups and 03 chin ups. Prospective candidates are also advised to keep themselves in good physical condition to adapt to physical training at AFA which encompasses running, swimming, rope climbing and other forms of physical training/ conditioning in which they would undergo mandatory tests during training.

22. Query. For queries related to conduct of online examination, registration process and admit cards contact 020-25503105 or 020-25503106 or E-Mail afcatcell@cdac.in. For queries regarding eligibility, allotment of AFSB centres, date of AFSB interview, merit list and Joining Instructions contact 011-23010231 Extn 7610 or Toll free number 1800-11-2448.

23. Disclaimer. Information given in the advertisement and on the website are only guidelines. In case of any ambiguity, the existing policies, rules and regulations of IAF/ Govt. of India as amended from time to time will be final and binding. Terms and conditions given in the advertisement are only guidelines and are subject to change without notice.

24. Statutory Warning. Selection in the Indian Air Force is fair and merit based. Attempt to influence the selection process at any stage, or use of any unfair means like forgery, impersonation or supplying false information etc. is liable to lead to termination of candidature or initiation of service and legal action against the concerned individual.

Modern Warfare Target Minds, Systems, and Perception

The evolution of emerging technologies continues to reshape the way wars-declared or undeclared, kinetic or non-kinetic-are fought. Non-kinetic warfare is likely to dominate, while the role of full-scale traditional kinetic warfare may remain largely as a deterrent. Kinetic weapons may still be employed in conjunction with non-kinetic strategies, particularly to physically occupy and control territories conquered through non-kinetic means.

The pace at which non-kinetic warfare and associated technologies, particularly cyber and cognitive warfare, are advancing is unprecedented. To counter Bharat's rise as a global superpower and formidable competitor, adversaries have employed- and continue to use various tactics, including cognitive warfare.

Examples include Macaulay's education doctrine, pre- and post-1947 divisive strategies leading to Bharat's partition, asymmetric warfare in Jammu and Kashmir and the Northeast, Naxalite insurgencies in central Bharat, and numerous attempts to hinder the nation's progress through hyper-activism and unethical protests.

With Bharat now the world's fifth-largest economy and poised to soon become the third, dedicated efforts are essential to position Bharat as a global leader in these critical technologies.

Patent Power: India's Rise as a Global Innovation Hub

Advitya Bahl

The World Intellectual Property Organization (WIPO) plays a pivotal role in shaping the global Intellectual Property (IP) landscape. Each year, WIPO's World Intellectual Property Indicators (WIPI) report provides comprehensive insights into global IP filing trends. The 2024 WIPO report is particularly significant for India as it highlights country's increasing prominence in the innovation space. With impressive gains in patent, trademark, and industrial design applications, India's growth in IP filings is a testament to its evolving position as a global innovation powerhouse.

India ranks 6th globally in patent applications, with 64,480 filings in 2023, reflecting a remarkable growth rate of +15.7%. This growth continues a streak of double-digit increases over the past five years, underscoring India's rising stature as a key player in global IP. India's strong presence in patents places it alongside top-tier countries such as China, the United States, Japan, and South Korea, and highlights its transition into a hub for technological and scientific advancements.

A Shift Toward Domestic Innovation: One of the most remarkable shifts seen in the 2024 report is the rise in domestic patent filings. In 2023, more than half (55.2%) of India's patent applications came from Indian residents—an unprecedented milestone. This shift signals a growing culture of innovation within India, where local companies, universities, and research institutions are becoming increasingly active in generating new technologies and intellectual property. Such trends reflect the success of governmental initiatives such as the National Intellectual Property Rights (IPR) Policy and the *Atmanirbhar Bharat* campaign, which have played crucial roles in fostering an innovation-friendly environment across sectors.

Furthermore, India's patent-to-GDP ratio, which tracks the economic contribution of patent activity, has seen a significant rise, from 144 in 2013 to 381 in 2023. This growth indicates that innovation is playing an increasingly critical role in driving India's economic growth and transformation into a knowledge-driven economy.

Surge in Industrial Design Applications: India's surge in industrial design applications is another noteworthy aspect of its IP performance. In 2023, industrial design filings grew by 36.4%, marking a shift towards greater emphasis on creativity, design, and product innovation. This growth spans across diverse sectors such as textiles, automobiles, consumer electronics, and healthcare. The textile and fashion industries, in particular, benefit from India's rich cultural heritage, which fuels a growing demand for innovative designs, both domestically and internationally.

India's focus on industrial design reflects a broader

transformation of its manufacturing sector. The country is increasingly positioning itself as a global manufacturing hub that prioritises not just mass production but also value-added, design-driven innovation. This trend is particularly significant in sectors such as health and cosmetics, where aesthetics and functionality are crucial to product success.

Strengthening Brand Protection: India's trademark filings also saw significant growth in 2023, with the country ranking 4th globally. India's 6.1% year-on-year increase in trademark filings reflects the growing importance of brand protection in the country's thriving domestic and international markets. Indian businesses, driven by a burgeoning entrepreneurial spirit, are increasingly aware of the need to protect their brands to ensure their competitiveness in the global market.

Nearly 90% of India's trademark filings in 2023 were made by Indian residents, underscoring the domestic focus on securing brand identities. With over 3.2 million active trademarks in force, India now holds the second-largest number of active trademark registrations globally, positioning it as a leader in global brand protection.

Government Initiatives and Support

1. National Intellectual Property Rights (IPR) Policy: Intellectual Property Rights (IPR) are at the heart of driving creativity and innovation, both of which are essential for the growth and progress of any knowledge-based economy. In India, there is a rich and abundant flow of creative and innovative energies, laying the foundation for a thriving IPR ecosystem. As the world's largest democracy and one of the fastest-growing economies, India has developed a robust, TRIPS-compliant, and equitable IPR regime designed to stimulate and protect the intellectual creations that fuel progress across various sectors.

The National Intellectual Property Rights (IPR) Policy seeks to leverage the power of intellectual property to unlock the nation's full potential, fueling economic growth while safeguarding public interests. This policy envisions a holistic and dynamic ecosystem that promotes the creation, protection, and commercialisation of IP assets, driving the socio-economic development of the country.

At the core of the National IPR Policy is the recognition of intellectual property as not just a legal asset, but a powerful economic tool with the potential to transform industries, foster innovation, and advance India's position on the global stage. The policy aims to raise awareness about IPRs as valuable financial assets, encourage their commercialisation, and build a system that fosters creativity while ensuring the protection of the public interest.

The vision for India's IPR landscape is clear: to create an environment where intellectual property stimulates creativity and innovation across fields such as science, technology, arts, culture, traditional knowledge, and biodiversity. In this vision, India will become a nation where knowledge is the key driver of development, where intellectual property is not just protected but shared for the greater benefit of society. It encourages the generation and commercialisation of intellectual property, while modernising and enhancing service-oriented IPR administration and bolstering enforcement mechanisms to combat IPR infringements.

2. Scheme for Startups Intellectual Property Protection (SIPP): Launched in 2016, this scheme supports startups by providing access to high-quality IP services, covering professional fees for IPR services. It

aims to help startups protect and commercialise their innovations, and is set to run until March 31, 2026.

3. Draft Model Guidelines for Academic Institutions: These guidelines aim to promote innovation through research, ensuring fair processes for IP ownership, control, and revenue sharing. It also encourages disclosure of IP filings for government-funded research.

4. National Intellectual Property Awareness Mission (NIPAM): Launched in December 2021, NIPAM is a nationwide initiative aimed at educating 1 million students on intellectual property, encouraging creativity, and helping students in higher education understand and protect their innovations.

Legislative and Administrative Landscape

Over the past two decades, the Indian government has taken significant steps to align its Intellectual Property Rights (IPR) regime with national development priorities and international agreements. This has resulted in a robust, dynamic, and TRIPS-compliant IPR framework, with continuous improvements in administration, management, and enforcement.

TRIPS Compliance: Meaning and Significance

TRIPS (Trade-Related Aspects of Intellectual Property Rights) is an international legal agreement that sets out minimum standards for the protection and enforcement of intellectual property (IP) rights globally. It was established under the World Trade Organization (WTO) in 1994 and covers a broad range of IP types, including patents, copyrights, trademarks, geographical indications, industrial designs, and trade secrets.

For India to be **TRIPS compliant** means that the country adheres to the standards and obligations set out by TRIPS. This includes aligning its national laws and policies with the provisions laid out in the agreement. Specifically, India's IPR laws to meet the following TRIPS requirements:

1. Minimum Protection Standards: India provides protection for various types of intellectual property, ensuring a basic level of rights for creators, inventors, and innovators.

2. Patent Protection: TRIPS mandates patent protection for inventions in all fields of technology, including pharmaceuticals, for at least 20 years. However, India has introduced certain provisions, such as Section 3(d) of the Patents Act, to prevent "evergreening" of patents and to protect public health, especially concerning affordable access to medicines.

3. Copyright Protection: TRIPS requires that copyright be granted for at least the life of the author plus 50 years (extended in some cases, such as for films or anonymous works).

4. Trademarks and Geographical Indications: The agreement sets clear guidelines on trademark registration, protection, and enforcement. It also covers the protection of geographical indications (GIs), such as "Darjeeling Tea" or "Basmati Rice," which are linked to specific regions or communities.

5. Enforcement and Compliance: TRIPS obligates countries to establish effective legal mechanisms for the enforcement of IP rights. This includes measures to prevent counterfeiting, piracy, and IP violations, along with providing an efficient judicial and administrative system for IP disputes.

6. Technology Transfer: The agreement encourages the transfer of technology to developing countries, providing a framework that allows for the protection of IP while also fostering innovation and technology sharing.

Being **TRIPS compliant** has helped India enhance its global trade relations, attract foreign investments, and promote innovation. It has also strengthened India's position in international trade negotiations and supported the growth of domestic industries by protecting the intellectual property created within the country.

For India, being TRIPS compliant also balances the protection of intellectual property rights with the need for access to affordable medicines and sustainable innovation, especially in fields crucial to public welfare.

India's IPR laws include the Patents Act, 1970; Trade Marks Act, 1999; Designs Act, 2000; Geographical Indications Act, 1999; Copyright Act, 1957; Protection of Plant Varieties and Farmers' Rights Act, 2001; Semiconductor Integrated Circuits Layout-Design Act,

Types of IPR

- 1. Patents:** Patents grant exclusive rights to inventors for a novel, useful, and non-obvious invention, typically for 20 years. They protect industrial products or processes that offer technological solutions to technical challenges.
- 2. Industrial Designs:** These refer to the visual aspects (shape, colour, pattern, etc.) of a product. For registration, the design must be novel, unique, and not violate public morals.
- 3. Copyright:** Copyright provides exclusive rights to authors of original creative works like books, music, films, and software. It allows authors to control reproduction and distribution of their works.
- 4. Trademarks:** Trademarks distinguish goods or services by symbols, names, logos, or packaging. They help consumers identify products and services in the marketplace.
- 5. Geographical Indications (GI):** GIs identify products from specific locations with qualities or reputations tied to their origin, like Darjeeling tea or Basmati rice.
- 6. Semiconductor Integrated Circuit Layout-Design (SICLD):** SICLD protects the layout design of semiconductor circuits, governed by the SICLD Act, 2000.

Types of IP Licensing

- 1. Exclusive Licensing:** The IP is licensed to one entity only, granting them exclusive rights to use it.
- 2. Non-exclusive Licensing:** Multiple entities can be granted licenses to use the same IP, often for different purposes.
- 3. Sub-licensing:** The licensee may transfer their licensing rights to another party, provided this is specified in the agreement.

PM Vidyalaxmi: A Mission Mode Scheme to Provide Financial Support to Meritorious Students

**Dr. Rajesh Kumar
Vinayak Kumar Jha**

The National Education Policy (NEP) 2020 outlines a comprehensive roadmap for transforming the Indian education system in the 21st century, underpinned by five foundational pillars: Access, Equity, Quality, Affordability, and Accountability. The recently launched Pradhan Mantri (PM) Vidyalaxmi Scheme aligns with the principles of NEP 2020. Prime Minister Shri Narendra Modi has emphasised that initiatives like Vidyalaxmi are part of India's commitment to becoming a welfare society. Through NEP 2020 and schemes such as Vidyalaxmi, the government aims to remove structural barriers, ensuring that youth can focus solely on their studies and future, without other concerns.

PM Vidyalaxmi is a Mission Mode Scheme primarily designed to promote accessible and equitable higher education for meritorious students across the country by offering financial assistance. It seeks to eliminate barriers to accessing quality education at reputed Higher Education Institutions (HEIs) through collateral-free and guarantor-free loans. The scheme targets deserving students from all sections of society, with particular emphasis on weaker and marginalised groups, in line with the guiding principles of the National Education Policy 2020.

The key stakeholders of the PM Vidyalaxmi Scheme are students with both merit and financial need. Interest subventions and loan guarantees help alleviate some of the financial pressure on students and their families. The scheme aims to bridge the gap between ambition and opportunity, ensuring that meritorious students are not denied access to higher

education due to financial constraints.

The benefits of the scheme will be accessible to students through the PM Vidyalaxmi portal, a one-stop platform designed to streamline the loan application and disbursement process. Students who secure admission to the top 860 Higher Educational Institutions (HEIs) in India, as per the National Institutional Ranking Framework (NIRF), can apply for loans under the scheme. With both collateral-free and guarantor-free loan processes, the scheme simplifies the often complex and restrictive process of financing education.

PM Vidyalaxmi Budget Allocation: The initial allocation of funds for the PM Vidyalaxmi scheme is Rs. 3,600 crore for the financial years 2023-24 to 2030-31. It is expected to support 22 lakh meritorious students every year, with the goal that financial constraints should never hinder academic excellence. The PM Vidyalaxmi Scheme has the potential to accelerate the pace of the Gross Enrolment Ratio (GER), alongside other schemes such as PM Uchchatar Shiksha Protsahan (PM-USP), Central Sector Interest Subsidy (CSIS), and the Credit Guarantee Fund Scheme for Education Loans (CGFSEL), among others.

It is important to note that the Government of India has implemented several reformative measures to increase the GER in higher education, which currently stands at around 28.4%, as per the All India Survey of Higher Education (AISHE) 2022-23, Ministry of Education, Government of India. In comparison, the GER in developed nations is: USA (80%), Canada (90%), the UK (80%), Germany (70%), and Australia (85%). To match the pace of global higher education, the

Government of India has set a target of achieving a 50% GER by 2035.

PM Vidyalaxmi Benefits: The scheme offers a distinctive feature of accessible financial aid, significantly reducing the financial burden typically associated with bank loans. It provides education loans without the need for collateral or a guarantor. Furthermore, the scheme attracts banks by offering a 75% credit guarantee on loans up to Rs. 7.5 lakh, which encourages these institutions to lend to deserving students.

Under this scheme, there is also an interest subvention of 3% on loans up to Rs. 10 lakh for families with annual incomes of up to Rs. 8 lakh. A complete interest subvention is available for students from families with incomes below Rs. 4.5 lakh, provided the student is studying at approved Higher Education Institutions at diploma, graduate, or postgraduate levels in technical or professional programmes. This financial aid will be disbursed through e-vouchers and Central Bank Digital Currency (CBDC) wallets, ensuring transparency and traceability in the disbursement process.

PM Vidyalaxmi Beneficiaries: Focused on rewarding academically deserving students from disadvantaged economic backgrounds, the scheme will cover students who secure admission to quality institutions, as per the National Institutional Ranking Framework (NIRF) ranking. The PM Vidyalaxmi Scheme will benefit over 22 lakh meritorious students across the country every year. Education Minister Shri Dharmendra Pradhan emphasised that "No student in India should have to give up on their dreams due to financial limitations." This aligns with the vision of NEP 2020, which advocates for accessible, equitable, and quality education for all.

PM Vidyalaxmi Support Mechanism: PM Vidyalaxmi is not merely a scheme to provide loans; it aims to create an ecosystem in which students from any family can dream big and realise them. The scheme alleviates the financial pressure of repaying high-interest loans, allowing students to focus on their studies. This assistance is particularly vital in high-cost education fields, such as professional and technical courses, where education plays a crucial role in the national workforce.

The scheme builds upon existing financial aid programmes like the PM-USP and its components, such as the Central Sector Interest Subsidy (CSIS) and the Credit Guarantee Fund Scheme for Education Loans (CGFSEL), which

specifically target students from lower-income families pursuing technical or professional courses. Together, these initiatives create a cohesive support framework for aspiring students, helping them secure education without financial strain.

Application Process and Accessibility: To apply for financial support under the PM Vidyalaxmi Scheme, students must visit the dedicated PM Vidyalaxmi portal, where they can submit their loan applications. The portal is designed for user-friendliness, ensuring students can apply without excessive documentation or complicated procedures. With an entirely digital process, the portal enables students to monitor their applications, check eligibility for interest subventions, and track loan disbursement, making the experience seamless and transparent.

This centralised platform serves as the access point for all aspects of the scheme, from loan applications to checking eligibility for interest subventions. By consolidating services under one portal, the government has ensured that students across India can easily navigate the system and access the financial support they need. Students eligible for interest subventions can apply directly on the portal, where payments will be processed through e-vouchers and CBDC wallets. The integration of digital currency not only streamlines the payment process but also aligns with India's shift towards a digital economy.

Conclusion: The PM Vidyalaxmi Scheme represents a significant step forward in making education more accessible and equitable. By eliminating the financial barriers that families from low socio-economic backgrounds often face in achieving their educational aspirations, this scheme underscores the government's commitment to fostering a society where education is not constrained by economic limitations. With the visionary spirit of NEP 2020, combined with the potential of modern digital tools, PM Vidyalaxmi is poised to empower the youth of India, enabling them to become the catalysts for a bright, learned, and intelligent future for New India. The scheme will transform millions of lives, allowing students to pursue their academic dreams without the burden of financial constraints.

Patent Power: India's Rise as a Global Innovation Hub

2000; and Biological Diversity Act, 2002. The Department of Industrial Policy and Promotion (DIPP) oversees IPR matters and coordinates with the World Intellectual Property Organization (WIPO) and other ministries.

The Controller General of Patents, Designs, and Trade Marks (CGPDTM) administers IPR laws through regional offices in Chennai, Delhi, Kolkata, and Mumbai. The Copyright Act is managed by the Ministry of Human Resource Development, while the Protection of Plant Varieties Act is under the Ministry of Agriculture. The Department of Information Technology manages semiconductor layouts, and the Ministry of Environment handles biological diversity.

India has ratified key international treaties, including the Marrakesh Treaty and the Madrid Protocol, and the Indian Patent Office has been recognised as an International Search and Preliminary Examination Authority. The country's IPR regime also includes judicial review mechanisms, with Indian courts consistently enforcing IP laws. Efforts have been made to modernise IP offices, improve e-services, and enhance public access to IP information through innovative digital tools.

Emerging Careers

For job seekers, India's growing IP activity presents a wealth of career opportunities. The rapid expansion of patent, trademark, and industrial design filings necessitates a range of new roles in patent law, IP strategy, innovation management, and licensing. As Indian

businesses increasingly recognise the value of protecting their intellectual assets, demand for professionals in areas such as brand management, trademark protection, and IP commercialisation is set to rise. This shift not only supports entrepreneurship by offering legal and business frameworks to protect and monetise new ideas, but also fosters a broader entrepreneurial ecosystem that encourages risk-taking, creativity, and technological advancement.

Furthermore, the focus on intellectual property as a key driver of economic growth is helping to position India as a knowledge-driven economy. With industries across sectors leveraging innovation to gain a competitive edge, IP-related careers are not only lucrative but also integral to the country's economic future. As India strengthens its IP infrastructure and enhances its global trade relationships, the demand for skilled professionals in the field will only increase. This vibrant landscape offers numerous pathways for individuals seeking to play a part in shaping India's future as a global leader in innovation. Whether it's through contributing to the protection of groundbreaking inventions or helping to commercialise new technologies, there has never been a better time for career seekers to explore the diverse opportunities emerging in India's rapidly evolving IP ecosystem.

Play, Create, Innovate: Careers in Game Design

comics, and animations reaching international markets.

India's Path to Becoming a Global AVGC Hub

The government's commitment to developing the AVGC sector through initiatives like the NCoE is a game-changer for the Indian gaming industry. As immersive technologies like VR, AR, and MR gain prominence, India is well-positioned to lead the way in content creation, not just for gaming but across the broader media and entertainment industry. By integrating state-of-the-art technologies, leveraging India's rich cultural heritage, and fostering a robust ecosystem for innovation, the country is

set to become a powerhouse in the global AVGC space.

This comprehensive strategy will propel India's gaming sector to new heights, making it a global leader in creative and immersive digital entertainment. With the NCoE at the helm, India's vision for the AVGC sector is clear: to build an industry that is not just globally competitive but also culturally resonant, offering innovative, world-class content that reflects India's diverse storytelling traditions.

BEST ENTRY

BEST ENTRY FOR

ISSUE DATED 9 - 15 November 2024

Q. How do you think initiatives like the International Big Cat Alliance and India's Lifestyle for the Environment (LiFE) programme can shape global efforts to protect endangered species and promote sustainable living?

Best Entry: Initiatives such as the International Big Cat Alliance (IBCA) and India's Lifestyle for Environment (LiFE) programme play a vital role in advancing global conservation efforts. These programmes not only aim to protect endangered species but also foster sustainable living practices. Here's how these initiatives are making an impact:

- Conservation Impact
- Species Protection:**
The IBCA focuses on safeguarding big cat populations by addressing critical issues such as habitat loss, poaching, and human-wildlife conflict.
 - Habitat Preservation:**
LiFE advocates for eco-friendly practices, striving to reduce deforestation and preserve the rich biodiversity of ecosystems.
 - Research and Monitoring:**
Both initiatives support scientific research, helping to track species populations and monitor the overall health of ecosystems.
- Sustainability and Education
- Community Engagement:**
The success of IBCA and LiFE lies in involving local communities in conservation efforts, promoting peaceful coexistence between humans and wildlife.
 - Environmental Education:**
LiFE encourages sustainable living by raising awareness of eco-friendly practices, empowering individuals to contribute to environmental protection.
 - Capacity Building:**
Both programmes provide training opportunities for conservationists, policymakers, and local communities to enhance their skills and involvement in sustainability efforts.
- Global Influence
- Collaboration and Knowledge Sharing:**
International partnerships between governments, NGOs, and conservation bodies allow for the exchange of best practices, driving more effective solutions.
 - Policy Influence:**
Successful models from IBCA and LiFE inform policy decisions, shaping national and global conservation agendas.
 - Inspiring Action:**
High-profile initiatives like IBCA and LiFE raise awareness and inspire individuals and organisations worldwide to engage in conservation efforts.
- Scalability and Replicability
- Replicable Models:**
The successful conservation strategies employed by IBCA and LiFE can be adapted to protect other endangered species and ecosystems across the globe.
 - Scalable Impact:**
Collaborations and partnerships help extend the reach and impact of these initiatives, making them more effective in achieving their goals.
 - Financing Conservation:**
These initiatives attract funding from various sectors, providing the necessary financial support for continued conservation efforts.
- Recommendations for Future Progress
- Integrate Technology:**
Leverage innovations like monitoring sensors, AI-powered conservation tools, and virtual education platforms to enhance the effectiveness of conservation efforts.
 - Foster Global Partnerships:**
Collaborate with international organisations, governments, and NGOs to maximize the impact and scale of conservation initiatives.

Employment News

Question of the Week

How do you see BSNL's Direct to Device (D2D) connectivity solution benefiting people living in isolated areas, particularly when it comes to accessing online services like UPI payments?

Entries may be sent to writetous.en@gmail.com latest by **11/12/2024** in English/Hindi/Urdu and should be of **200 to 250 words**. Entrants must clearly mention their **Name, Age, Full Address, Email ID and Contact No.** The entry adjudged best will be published in **Employment News/Rozgar Samachar issue (dated 21 - 27 December 2024)** and **will be eligible for a three-month free subscription of Yojana/ Kurukshetra/ Aikal as per the winner's choice.**

- Empower Local Communities:**
Strengthen community-led conservation initiatives by providing resources and support to those at the grassroots level.
- The Path Ahead
- By scaling up initiatives like IBCA and LiFE, we can:
- Protect critically endangered species**
 - Promote sustainable development**
 - Inspire global environmental stewardship**
- These efforts will significantly contribute to achieving the UN Sustainable Development Goals (SDGs), including:
- SDG 12:** Responsible Consumption and Production
 - SDG 13:** Climate Action
 - SDG 15:** Life on Land
- Together, these initiatives are paving the way for a more sustainable and harmonious coexistence between humans and the environment.

PM Modi's Global Diplomacy: Strengthening Ties across Continents

Prime Minister Shri Narendra Modi's recent diplomatic engagements in Guyana, Brazil, and with global leaders highlighted India's commitment to fostering partnerships and advancing the Global South's interests. In Georgetown, Guyana, PM Modi and President Dr. Mohammed Irfaan Ali signed ten MoUs spanning healthcare, defence, broadcasting, and digital payments, marking the first visit by an Indian Prime Minister to the country in 56 years. During the 2nd India-CARICOM Summit, PM Modi proposed a seven-pillar plan for regional cooperation, focusing on climate resilience, trade, healthcare, and agriculture. He was also conferred with Dominica's highest civilian honour. At the G20 Summit in Rio de Janeiro, PM Modi met Brazilian President Mr. Luiz Inácio Lula da Silva and discussed ways to enhance ties in biofuels, energy, and defence. With Australian PM Mr. Anthony Albanese, he reinforced the India-Australia Strategic Partnership, launching a Renewable Energy Partnership. Meanwhile, following the talks with PM Modi, UK PM, Mr. Keir Starmer announced the relaunch of India-UK Free Trade Agreement talks, focusing on jobs, education, and climate action. Prime Minister Shri Narendra Modi received the 'Grand Commander of the Order of the Niger' award during his visit to Nigeria.

Prasar Bharati Launches OTT Platform WAVES

India's national broadcaster, Prasar Bharati, has launched its new OTT platform, WAVES, aimed at providing family-friendly entertainment and embracing digital trends. The platform was unveiled at the 55th International Film Festival of India (IFFI) in Goa. WAVES features iconic Indian shows such as *Ramayan*, *Mahabharat*, *Shaktimaan*, and *Hum Log*, connecting audiences with India's cultural heritage. It also offers news, documentaries, regional content, and live events, including *Mann Ki Baat* by Prime Minister Shri Narendra Modi and live cricket coverage. With content in over 12 languages, WAVES caters to a diverse audience, offering more than 65 live channels, on-demand video, and e-commerce features.

Health Ministry Urges States to Include Air Pollution Strategies in Action Plans

The Union Health Ministry has directed States and Union Territories to incorporate air pollution mitigation strategies into their climate change and health action plans. In a letter to Chief Secretaries and Advisors, Union Health Secretary Smt. Punya Salila Srivastava called for the development of district and city-level plans under the National Programme on Climate Change and Human Health (NPCCHH). She also recommended expanding the network of sentinel hospitals to monitor air pollution-related illnesses. She emphasised the need to follow updated health advisories and raise awareness among vulnerable groups to address the dual challenges of air pollution and climate change.

CCI Fines Meta Rs. 213.14 Crore over WhatsApp's Privacy Violation

The Competition Commission of India (CCI) has fined Meta Rs. 213.14 crore over WhatsApp's 2021 privacy policy update. The CCI has also directed WhatsApp to stop sharing user data with other Meta-owned apps for advertising purposes for the next five years. The investigation, launched in March 2021, followed global concerns about the policy's data-sharing provisions, which allowed WhatsApp to share user data with Facebook and its subsidiaries. The CCI ruled that data sharing for purposes beyond WhatsApp's core services cannot be a condition for users to access the platform in India. In a separate development, India's Cybercrime Coordination Centre (I4C) and the Department of Telecommunications have blocked 17,000 WhatsApp accounts tied to cybercriminals in South-East Asia, bolstering the nation's digital security.

INTERNATIONAL

G20 Leaders Adopt Rio de Janeiro Declaration, Call for Action on Global Crises

At the 19th G20 Summit in Rio de Janeiro, leaders from the world's largest economies adopted the Rio de Janeiro Declaration, addressing critical global issues, including climate change, the wars in Ukraine and West Asia, and calls for reforms in global governance. The declaration also included a call for the reform of the United Nations Security Council to improve the representation of underrepresented and unrepresented regions and groups. It reaffirmed the commitment to multilateralism, highlighting the progress made under the UN Framework Convention on Climate Change (UNFCCC) and the Paris Agreement. In addition, the declaration condemned terrorism in all its forms and manifestations, reinforcing the global consensus on addressing security threats.

Defence Minister Calls for Inclusive Code of Conduct and Rule-Based Order in Indo-Pacific

India has called for a Code of Conduct that safeguards the legitimate rights of all nations, underscoring the need for peaceful co-existence, inspired by Buddhist principles, to counter rising global polarisation. During the 11th ASEAN Defence Ministers' Meeting-Plus (ADMM-Plus) in Laos on November 21, 2024, Defence Minister Shri Rajnath Singh emphasised the importance of a rule-based international order for peace and prosperity in the Indo-Pacific. He highlighted India's commitment to freedom of navigation, overflight, and adherence to international laws, including the UN Convention on the Law of the Sea (UNCLOS). Proposing a dedicated ADMM-Plus Defence Strategy on Climate Change, he called for innovative solutions to enhance resilience against natural disasters and protect defence infrastructure. On the sidelines of the event, Defence Minister Shri Rajnath Singh met his Chinese counterpart, stressing de-escalation along the India-China border. He also held discussions with the Defence Ministers of Malaysia and Laos, pledging closer collaboration on regional security and ASEAN unity.

RBI, Maldives Ink Deal to Boost Local Currency Trade

The Reserve Bank of India (RBI) and Maldives Monetary Authority (MMA) have signed an MoU to promote the use of the Indian Rupee (INR) and Maldivian Rufiyaa (MVR) in cross-border transactions. The agreement, signed by RBI Governor Shri Shaktikanta Das and MMA Governor Mr. Ahmed Munawar in Mumbai, will enable businesses to invoice and settle payments in INR and MVR, reducing transaction costs and settlement times. The move is expected to strengthen bilateral trade, deepen financial integration, and enhance economic ties between India and the Maldives.

ECONOMY

India Tops G20 with Projected 7% GDP Growth in 2024

India is projected to lead the G20 with an impressive 7% GDP growth rate for 2024, demonstrating its strong economic performance amidst global uncertainties. This forecast positions India ahead of its peers, with Indonesia following at 5% and China at 4.8%. The projected growth reflects India's resilience and its ability to navigate challenges, such as geopolitical tensions and economic disruptions. This remarkable performance underscores India's fast-paced recovery and highlights its emerging role as a global economic powerhouse. The country's robust economic fundamentals continue to drive growth, contributing significantly to its leadership position in the G20.

World Fisheries Day 2024 Focuses on Economic Sustainability in Fisheries

The Department of Fisheries marked World Fisheries Day 2024 in New Delhi on November 21, 2024, highlighting initiatives that promote economic growth in small-scale and sustainable fisheries. Key initiatives launched during the event included the 5th Marine Fisheries Census and the Regional Plan of Action on Illegal, Unreported, and Unregulated (IUU) Fishing. Discussions during technical sessions focused on enhancing food security, creating alternative livelihoods, and fostering innovation in aquaculture and sustainable fisheries management. Experts stressed the importance of sustainable practices in driving economic growth, job creation, and resilience within the fisheries sector, while also addressing challenges posed by climate change.

VISION Portal Launched to Boost Skills and Innovation in Underprivileged Children

The government has launched VISION (Viksit Bharat Initiative for Student Innovation and Outreach Network) portal to enhance education, skill development, and innovation among underprivileged children. The initiative aims to provide access to mentorship and training, particularly for students in remote areas, to democratise opportunities and nurture entrepreneurial skills. It aligns with India's Vision 2047, which aspires to position the nation as a global leader in technology, education, and economic growth. The portal also seeks to bridge gaps in access to resources, empowering the next generation of innovators and leaders.

SPORTS

India Wins Women's Asian Champions Trophy, Defeats China 1-0

India triumphed over China 1-0 to win the Women's Asian Champions Trophy at Rajgir Hockey Stadium in Bihar, claiming their second consecutive title. This victory also saw India equal South Korea's record with three titles. The match remained goalless in the first half, but Deepika scored the winning goal with a penalty corner in the 31st minute of the third quarter. Deepika was named Player of the Tournament, finishing as the top scorer with 11 goals. Japan secured third place, defeating Malaysia 4-1.

Bihar to Host Khelo India Youth Games and Para Games in April 2025

Bihar will host the Khelo India Youth Games and Para Games in April 2025, as announced by Minister of Youth Affairs and Sports Dr. Mansukh Mandaviya. Highlighting Bihar's recent success in hosting major sporting events, such as the Women's Asian Champions Trophy in hockey, Dr. Mandaviya emphasised the government's commitment to bringing Khelo India Games to every corner of the country. He also underscored Bihar's role in the vision for Viksit Bharat by 2047, with the state playing a key role in developing infrastructure and supporting grassroots athletes. Bihar is home to 38 Khelo India Centres and a State Centre of Excellence, focusing on nurturing athletic talent.
