Intelligent leadership is necessary for Korea to keep up in AI

Jack Ma's comments about a market economies falling behind planned economies is becoming a reality for China, with AI driving its alarmingly fast advancement.

Working hours are holding back Korea's chip industry

In corporate R&D, both prototyping and commercialization are integral, yet the 52-hour workweek disrupts these workflows. By nature, R&D involves cycles of unpredictable problem-solving.

Life under a steel rainbow

One day, we must all leave this world without regret. It may not happen when we expect it, but no one is exempt.
